

## IMPROVING STANDARDS IN YOUR SECTOR

### HEALTHCARE

The control of bacterial infections such as MRSA, Campylobacter and Listeria and maintaining exceptionally high levels of cleanliness are critical within the healthcare sector.

One of the main challenges is preventing outbreaks of infections and diseases, which not only cost lives, but also resources and an organisation's reputation.

Controls in this environment focus on implementing and maintaining proper staff practices, keeping floors, equipment and surfaces sanitary.

Growing pressure to achieve excellent standards of patient care while meeting increasingly demanding targets against a backdrop of budgetary constraints, pose additional challenges within this industry.
